Product Information – September 2007

Description

A double sided clear polyester film tape coated with a modified acrylic emulsion adhesive system combined to a white release liner. The product offers high adhesion and clarity with good resistance to temperature, plasticisers, UV and ageing.

Applications

- . **Art and craft assembly aid**
- . **Bonding of light metal and plastic nameplates**
- . **Securing decorative trim**
- . **Permanent fixing of photographs and posters**
- .

Technical Details

Total Thickness	0.065mm
Tensile Strength	29n/cm
Elongation	110%
Steel Adhesion	3.0 n/cm
Temperature	-20 to 90°C (+120°C Short Term)

Note

Unless otherwise indicated, the figures above are average values and should not be treated at face value for specification purposes. The Company reserves the right to improve products, and any change in specification will result in a re-issue of the information sheet. Customers should satisfy themselves that the tape is suitable for their requirements whether after such modification or otherwise. Please check that you have the latest issue of the information sheet. All slitting and length tolerances are to British Standards, but other tolerances are available by request.
