Product Information – August 2007

Description

A dead soft electrolytic grade copper foil coated with an acrylic adhesive system.

Applications

- **Electrostatic shielding**
- **Printed circuit board manufacture and repair**
- **Stained glass fabrication**
- **Flexible flat conductor**

Technical Details

Total Thickness	0.739mm
Backing Thickness	0.317mm
Tensile Strength	45n/cm
Elongation	9%
Temperature	-40 to 120°C
Steel Adhesion	14n/cm
Dielectric Strength	-
Colours	Metallic Copper

Note

Unless otherwise indicated, the figures above are average values and should not be treated at face value for specification purposes. The company reserves the right to improve products, and any change in the specification will result in the re-issue of the information sheet. Customers should satisfy themselves that the tape is suitable for their requirements whether after such modification or otherwise. Please check that you have the latest issue of the information sheet. All slitting and length tolerances are to British standards, but other tolerances are available by request.
