

41B

Product Information – July 2007

Description

A composite backing based adhesive tape designed to offer excellent long term performance, mechanical and dielectrical strength. Excellent strength, puncture and abrasive resistance.

Applications

- . Phase insulation**
- . Outer wrap of coils, particularly on irregular windings**
- . Transformer core and final insulation**
- .**

Technical Details

Total Thickness	0.22mm
Backing Thickness	0.16mm
Tensile Strength	45n/cm
Elongation	20%
Temperature	130°C Class B
Steel Adhesion	5n/cm
Dielectric Strength	5000 Volts
Colours	Cream White

Note

Unless otherwise indicated, the figures above are average values and should not be treated at face value for specification purposes. The Company reserves the right to improve products, and any change in specification will result in a re-issue of the information sheet. Customers should satisfy themselves that the tape is suitable for their requirements whether after such modification or otherwise. Please check that you have the latest issue of the information sheet. All slitting and length tolerances are to British Standards, but other tolerances are available by request.
