

4330

Production Information – September 2007

Description

4330 is a finely creped, flexible, wet resistant and temperature resistant masking tape with a high tensile strength. 4330 can be removed very easily without leaving any residue.

Applications

- . Masking of circuit boards before plating.
- . Cable Bundling

Technical Details

Total Thickness	0.18mm
Backing Thickness	
Tensile Strength	108n/25mm
Elongation	13%
Temperature	160°C (1 hour)
Steel Adhesion	13 n/25mm
Dielectric Strength	
Colours	Cream

Note

Unless otherwise indicated, the figures above are average values and should not be treated at face value for specification purposes. The Company reserves the right to improve products, and any change in specification will result in a re-issue of the information sheet. Customers should satisfy themselves that the tape is suitable for their requirements whether after such modification or otherwise. Please check that you have the latest issue of the information sheet. All slitting and length tolerances are to British Standards, but other tolerances are available by request.
