

## **53HT**

### **Product Information – September 2007**

#### **Description**

High temperature masking tape based on semi crepe paper with good mechanical properties and outstanding thermal resistance. The silicone rubber adhesive system will support use up to 180°C for 60 minutes and 200°C short term shock.

#### **Applications**

- . Powder Coating
- . Plasma Spray
- .
- .
- .

#### **Technical Details**

Total Thickness	0.14mm
Backing Thickness	0.08mm
Tensile Strength	40n/cm
Elongation	9%
Temperature	180°C
Steel Adhesion	2.5 n/cm
Colours	Beige

#### **Note**

Unless otherwise indicated, the figures above are average values and should not be treated at face value for specification purposes. The Company reserves the right to improve products, and any change in specification will result in a re-issue of the information sheet. Customers should satisfy themselves that the tape is suitable for their requirements whether after such modification or otherwise. Please check that you have the latest issue of the information sheet. All slitting and length tolerances are to British Standards, but other tolerances are available by request.
