Production Information – June 2007

Description

A glass cloth based adhesive tape, designed for long term performance and resistance to continuous high temperature exposure. Excellent mechanical and dielectric strength. Silicone Rubber Adhesive. (UL Approved)

Applications

- . Motor phase insulation.
- . Coil end fixing
- . Outer wrap of coil windings
- . Transformers outer insulation
- . Heated conductors and resistance insulation.

Technical Details

Total Thickness	0.17mm
Backing Thickness	0.12mm
Tensile Strength	280n/cm
Elongation	5%
Temperature	180°C Class H
Steel Adhesion	2.3 n/cm
Dielectric Strength	2500 Volts

Note

Unless otherwise indicated, the figures above are average values and should not be treated at face value for specification purposes. The Company reserves the right to improve products, and any change in specification will result in a re-issue of the information sheet. Customers should satisfy themselves that the tape is suitable for their requirements whether after such modification or otherwise. Please check that you have the latest issue of the information sheet. All slitting and length tolerances are to British Standards, but other tolerances are available by request.
