Product Information – July 2007

Description

A polyester film based tape coated with a silicone polymer thermostable adhesive system. Excellent temperature performance UL Approved.

Applications

- Wrapping of cast resin capacitors
- Transformer coil core, layer and final insulation.
- Printed circuit board masking during etching and soldering processes.
- Splicing of plastic films and siliconised papers.

Technical Details

Total Thickness	0.07mm
Backing Thickness	0.025mm
Tensile Strength	10kg/25mm
Elongation	80%
Temperature	130°C (Class B)
Steel Adhesion	900 grms / 25mm
Dielectric Strength	5.5 KV
Colour	Clear, Green, Blue, Red

Note

Unless otherwise indicated, the figures above are average values and should not be treated at face value for specification purposes. The Company reserves the right to improve products, and any change in specification will result in a re-issue of the information sheet. Customers should satisfy themselves that the tape is suitable for their requirements whether after such modification or otherwise. Please check that you have the latest issue of the information sheet. All slitting and length tolerances are to British Standards, but other tolerances are available by request.
