

Red Litho

Product Information – June 2007

Description

A translucent red cellulose film coated with a natural rubber based adhesive system. Each roll is individually wrapped to give a longer shelf life and keep the tape clean

Applications

A specialised tape for the graphic arts, printing and photographic industries. The tape absorbs ultra-violet light, has good transparency and dimensional stability and is easy to remove

Technical Details

Elongation	20%
Temperature	up to 130°C
Steel Adhesion	6.4 n/25mm
Colours	Red
Widths available	12, 19, 25, 38, 50mm

Note

Unless otherwise indicated, the figures above are average values and should not be treated at face value for specification purposes. The Company reserves the right to improve products, and any change in specification will result in a re-issue of the information sheet. Customers should satisfy themselves that the tape is suitable for their requirements whether after such modification or otherwise. Please check that you have the latest issue of the information sheet. All slitting and length tolerances are to British Standards, but other tolerances are available by request.
